

Frame : FlowLayout

The image shows a Java Swing window titled "로그인 화면" (Login Screen). The window has a standard title bar with minimize, maximize, and close buttons. The content area is organized using a `FlowLayout`. It contains two text input fields. The first field is preceded by the label "아이디" (ID) and the text "TextFeild" is displayed inside the field. The second field is preceded by the label "비밀번호" (Password) and the text "TextFeild" is displayed inside the field. Below these fields is a button labeled "LOGIN".
