

```
for(int a : arr)  
    System.out.print(a);
```

0x9999

s

```
int[] score = {100,20,30,40,50};  
int[]      s  = score;  
int i = 10;  
int j = i
```

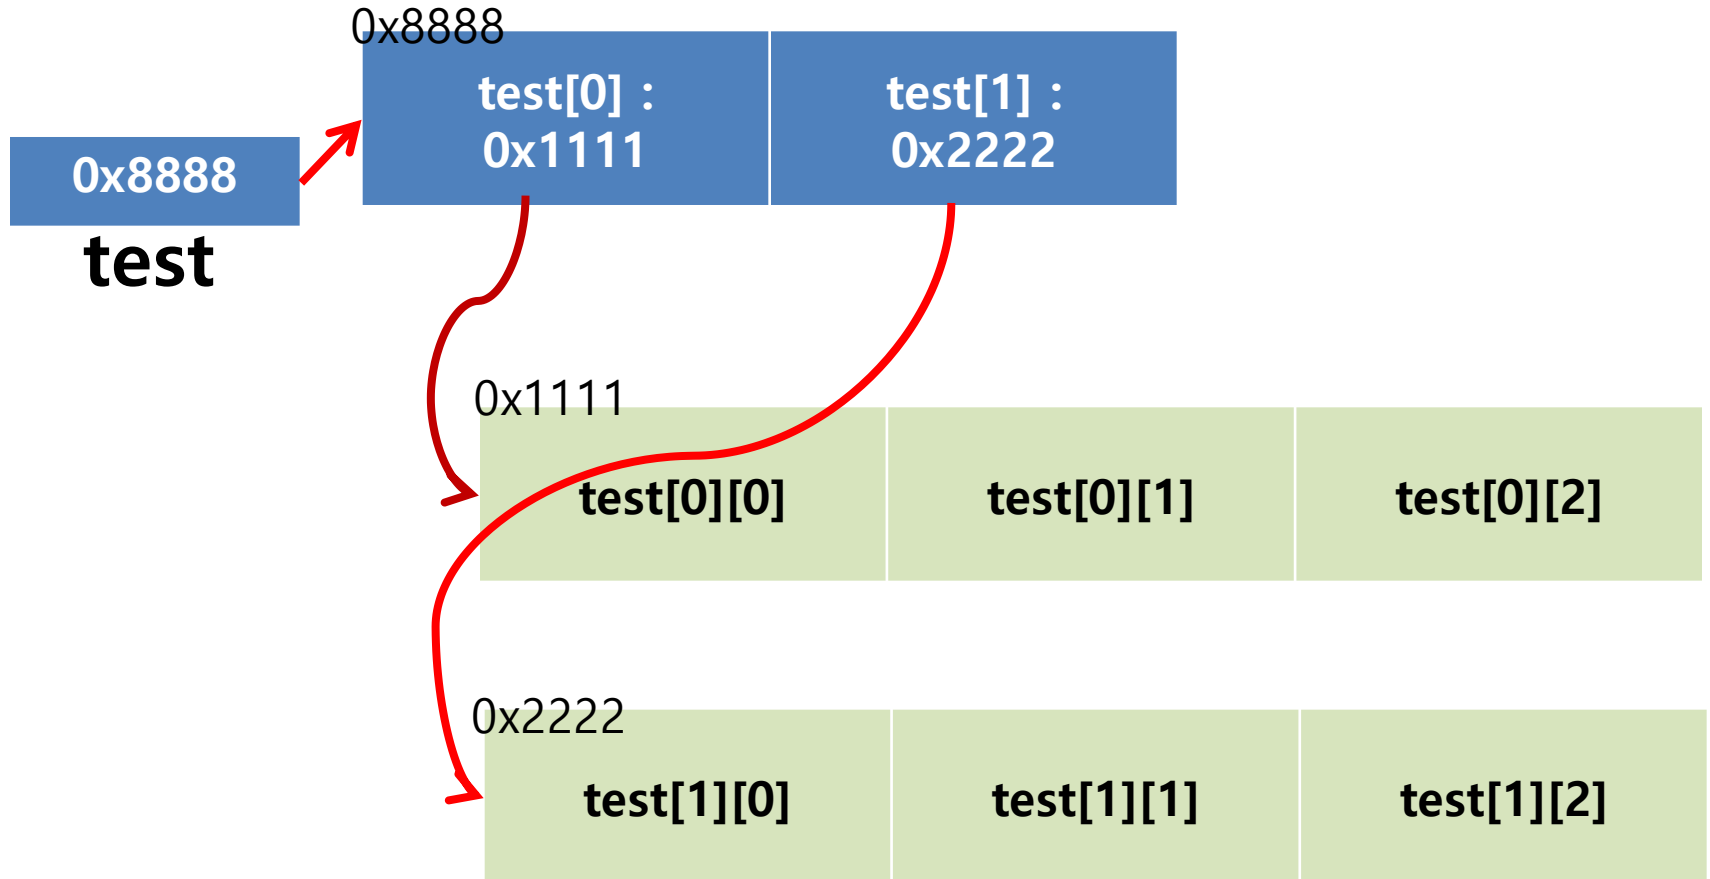

```
int[] score = {100,20,30,40,50};  
int[] s = new int[score.length];
```

```
int test[2][3] = new int[2][3];  
test[0][1] = 200;
```

test[0][0]	test[0][1]	test[0][2]
test[1][0]	test[1][1]	test[1][2]

```
Int[][] test = new int[2][3];  
test[0][1] = 200;
```

5-5. 배열문법

다차원 배열 (5_5_ex2_multiArr)

배열이 가리키는 데이터에 또다른 배열이 들어 있는 구조

```
int[ ][ ] iArr = new int[3][ ];  
int[0] = new int[2];  
int[1] = new int[3];  
int[2] = new int[2];
```

```
Int[ ][ ] iArr = new int[3][2];  
iArr[0][0] = 10;  
iArr[0][1] = 20;  
iArr[1][0] = 100;  
iArr[1][1] = 200;
```

....
